Textile solutions for architecture

vertisol
vertisolfloor

The background features a solid blue color with several dark blue, three-dimensional geometric shapes. On the left, there are two tall, thin rectangular prisms. In the center, there is a stack of two smaller rectangular prisms. To the right, there is another rectangular prism. In the foreground, there are two trapezoidal shapes, one on the left and one on the right, which appear to be leaning or tilted. The overall composition is minimalist and modern.

“Weave
what you
believe in.”

40 years of weaving passion /

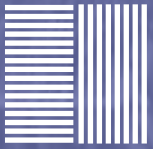

vertisol is a company manufacturer of technical fabrics for floor and wall covering, upholstery, acoustic panels, rugs and sun protection.

Constantly, we create and develop multiple solutions for these areas with a clear objective: to offer the greatest well-being, comfort and health for both people and the environment.

In our factories in Galicia and Catalonia, we produce 100% of our fabrics. This allows us not only to control the quality of our fabrics throughout the manufacturing process, but also forces us to constantly improve and innovate in the development of new products.

Sustainability, performance, design and comfort are the main objectives for which we work at **vertisol**, developing fabrics for the aforementioned applications, whether for Contract or residential use.

We do care

Product manufacturing in Europe

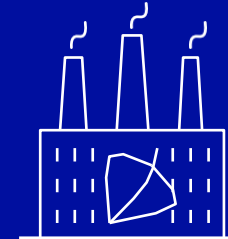

Installation and maintenance

We take care to provide all the necessary information to installers and cleaning teams for optimal installation and maintenance.

Respectful product

Our products are thoroughly risk-free. We take care to assure that the raw materials we use to manufacture the yarn meet the strict international standards. These standards regulate the use of chemicals that may pose a risk to the health of individuals or be a threat to the environment.

Process

We make sure that the quality of the different manufacturing processes, which are fully carried out at our facilities, is compatible with what the market demands of our finished product—maximum durability and wear resistance.

Protection

We have a strong commitment to the well-being of our users. That is why we apply specific treatments that lend our fabrics properties such as anti-mite and antibacterial protection, resistance to fire, to weather and light, and they are easy to clean.

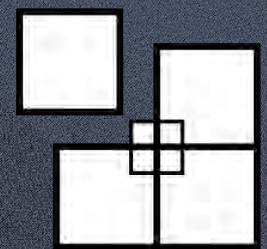

Modular, easy, fast and resistant installation/

Tic·Tac is the new installation system for **vertisolfloor** modular vinyl flooring, that needs no glue or adhesive. It is the perfect solution as they allow a **quick, simple and long-lasting installation.**

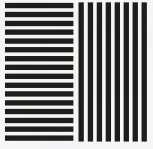

For a proper installation, it is only necessary to place the **vertisolfloor** tiles on a smooth and clean floor, and connect them with the Tic·Tac labels, placing them in the joints. This way, we achieve a strong fixation without using glue or damaging or deteriorating the subfloor, also **allowing to change the design or installation more frequently.**

Vinyl flooring has become a **living element of architecture**. We no longer think of the soil as a long-term building element, but it must be designed to be changeable.

Hotels: Modular flooring becomes an element of design, customization and identity for the hotel sector. The continuous rehabilitation of the hotel, a key factor in the hotel sector.

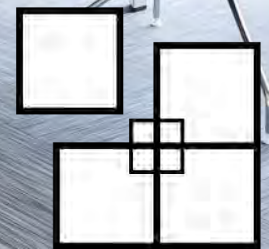

Offices: Modular floors designed to modify the size of work areas. The floor adapts the office to the needs of the market.

Retail: The floor as a modular element to differentiate the different spaces. The floor, protagonist of the shopping experience.

MODULAR FLOORING

New Construction and Rehabilitation Projects

tic-tac

junction tape

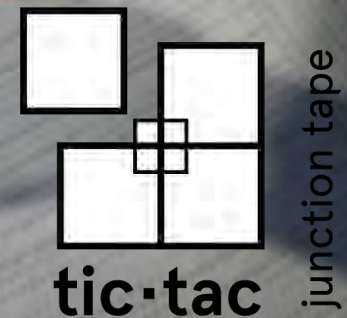

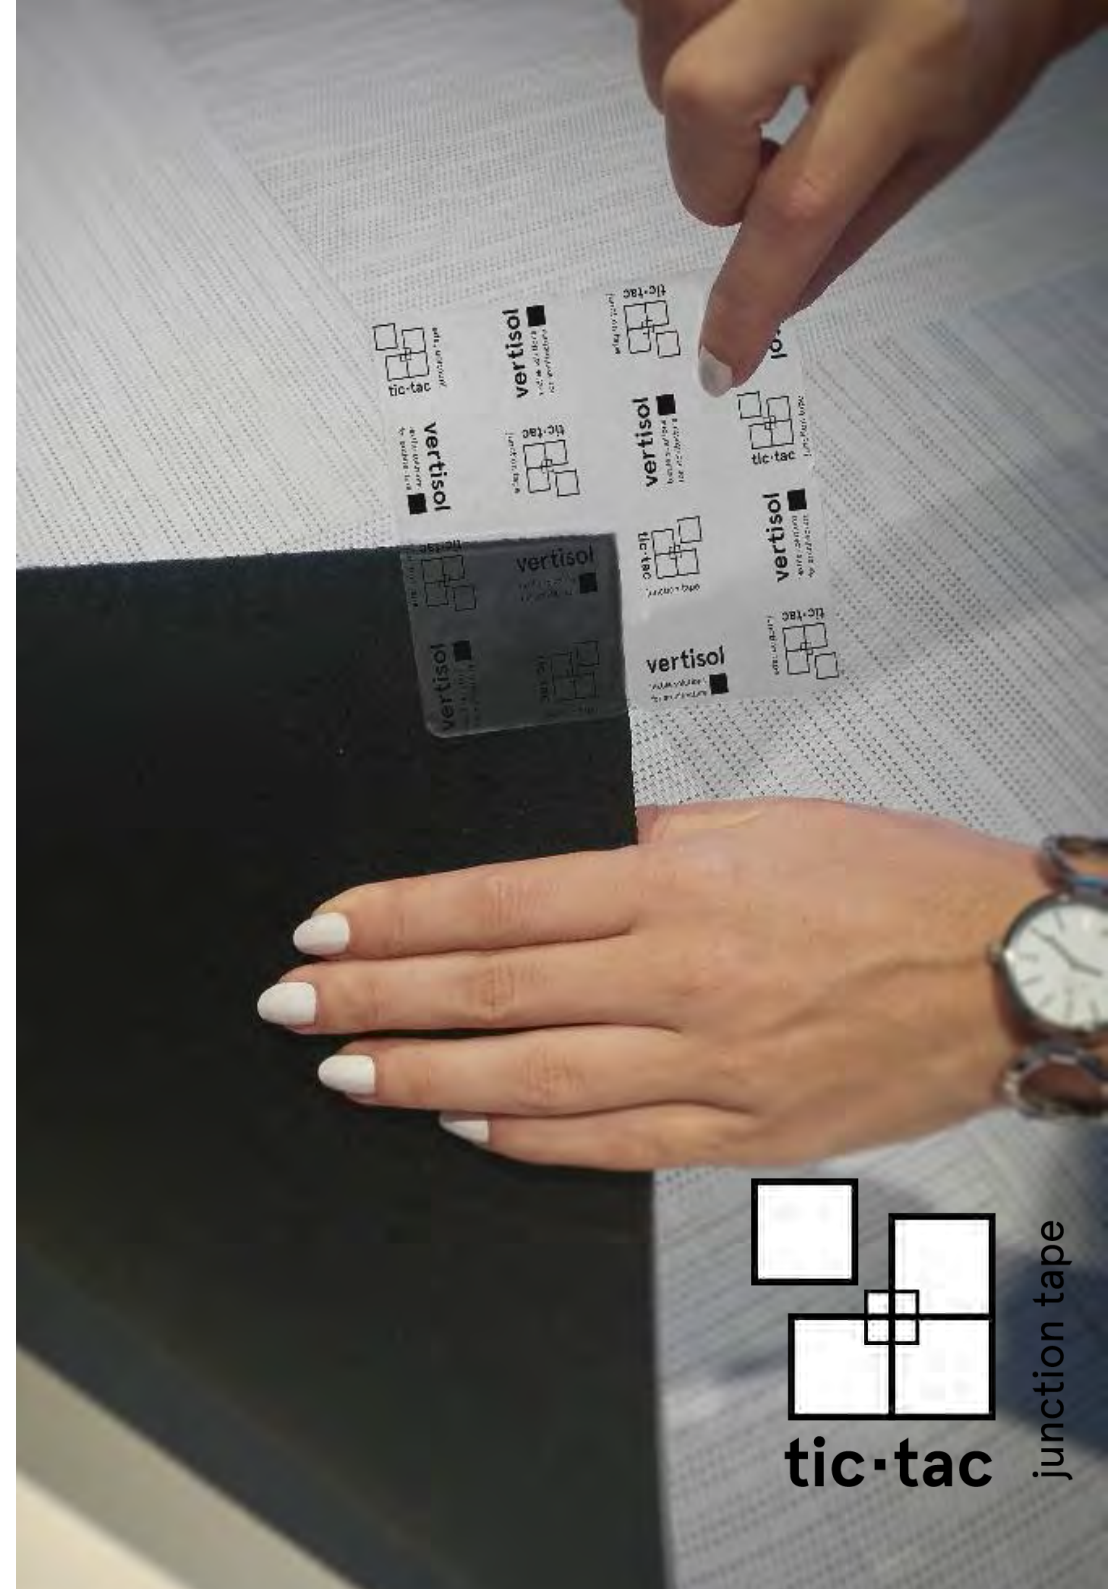

Tic·Tac is a solution that does not require installation by applying an adhesive on the floor. This allows greater modularity in the areas where it is installed. It also allows easily placing a design for a period and then change it, reduce it or enlarge it, depending on the project needs. Loose lay vinyl flooring is an ideal solution for offices, coworking spaces, corporate offices, etc.

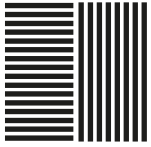

- Transparent **89x89mm** square labels
- **Rolls containing 480 Tic·Tac**
- Grooves that allow the area to be adhered perfectly centered for greater precision when placing the product
- Ideal for **modular flooring**
- **Quick, easy, and long-lasting installation**
- **Substitute for the use of removable glues** in the installation
- **It allows to reduce costs in the installation:** removable glues represent a much higher cost than the Tic·Tac system
- **Clean installation system:** leaves no adhesive residue on the floor or on the tiles
- **Does not damage or deteriorate the subfloor**
- Possibility of **changing the design or installation more frequently**
- **Resistant to humidity and temperature changes**

TIC · TAC

Installation System

vertisolfloor tiles must be installed in a checkerboard. Each of the tiles is marked on the back with an arrow indicating the direction.

Install anchor rows by placing the Tic·Tac connector at each joint.

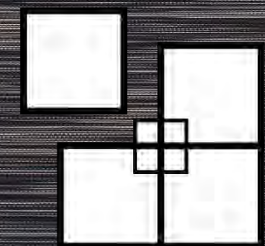

In case of Soundless tiles, the installation must reinforce by placing the Tic·Tac connector in the central areas of the joints as well.

Once the installation is finished, it is necessary to pass a pressure roller to eliminate the air chambers that may exist.

Complete installation manual available.
